

Mrs. Comiskey's Preschool Classes

March 29, 2019

Unit Study

This week we continued our study on sand with a focus on where sand is found. We looked at pictures of the beach and of sand dunes and talked about how they are formed. We looked at different colors of sand and how they are made. We also looked at animals that live in the sand. Our books this week were Where the Wild Things Are, Looking Closely Across the Desert, and A Look at Sand, Silt, and Mud.

School Improvement Days

This semester the a.m. class will not meet on school improvement days (April 12, and April 26).

Important Dates

April 18 - Easter Parties
April 19 & 22 - No School
May 3 - Family Potluck

Skill Focus

This week we practiced naming letters, shapes, and numbers and making patterns.

Donations

We are asking for donations of disinfecting wipes and playdough. If you can help, please send the donations to school with your child. Thank you to the families of Sofia Figueroa, Noe Rodriguez, and Dereck Escobar for the donations!

Sand Walk

On Tuesday, we took a walk to Elk's park to look at sand. We took samples of the sand to compare to the sand we have at school. We found that the sand from the park is a different color than the sand at school. That is because the rocks that make the sand were different colors.
